company profile

'18

It starts with a graphic construction of
visual design embodied through
craftsmanship, quality materials, artistic
direction, technology
leveraged with automation,

**we preserve
& multiply
beautiful ideas***

— A B O U T
U S

Duy Tran is one of the most technically advanced automated printing enterprise cater to major manufacturers of garment & textile in central Vietnam.

In 2012, our founders established a modern printing operation focusing on adopting new technologies that not only leveraging mass production but also consciously targeting environmental sustainability.

Despite numerous setbacks and competitions in the early days, our company stay committed to this vision while continuously bringing relentless efforts to honor the values that we provided to our customers, our partners as well as our employees.

We believe that innovations in printing technology impact not only the communicative identity of brands, or the preservation of beautiful designs, but also the humanistic appreciation for storytelling and meaningful conversations.
